Detecting a cavity is not as easy as seeing it in the mouth.

Children as young as two years of age are introduced to Xrays with two films that are taken of the upper and lower front teeth which often detect missing and or multiple teeth.

Halloween Safety Tips For Kids

Anytime a child has an accident, it's tragic. The last thing that you want to happen is for your child to be hurt on a holiday, it would forever live in the minds of the child and the family.

There are many ways to keep your child safe at ... [Read Article](#)
